(* : *Editor-in-chief*)

Volume 12

1971

Japanese Society of Plant Physiologists
Kyoto, Japan

The publication of this journal has been supported in part by financial aid from the Ministry of Education.

CONTENTS

No. 1, February, 1971

MAE, T., K. OHIRA and A. FUJIWARA: Fate of (+)S-methyl-L-cysteine sulfoxide in Chinese cabbage, *Brassica pekinensis* Rupr. 1

SATOH, K.: Mechanism of photoinactivation in photosynthetic systems IV. Light-induced changes in the fluorescence transient 13

KWON, Y. M. and B. R. GRANT: Assimilation and metabolism of glucose by *Dunaliella tertiolecta* I. Uptake by whole cells and metabolism by cell free systems 29

KLEIN, S., H. BARENHOLZ and A. BUDNIK: The initiation of growth in isolated lima bean axes. Physiological and fine structural effects of actinomycin D, cycloheximide and chloramphenicol 41

SYŌNO, K. and T. Furuya: Effects of temperature on the cytokinin requirement of tobacco calluses 61

KIKUTA, Y., T. AKEMINE and T. TAGAWA: Role of the pentose phosphate pathway during callus development in explants from potato tuber..... 73

TAKEBA, G. and A. TAKIMOTO: Metabolism of (−)-kaurene-^{3}H and (−)-kaurenol-^{3}H during the photoperiodic floral induction in *Pharbitis nil*..... 81

YOSHIDA, R., T. ORITANI and A. NISHI: Kinetin-like factors in the root exudate of rice plants 89

MANABE, K. and M. FURUYA: Factors controlling rates of nonphotochemical transformation of *Pisum* phytochrome *in vitro* 95

SUGAI, M.: Photomorphogenesis in *Pteris vittata* IV. Action spectra for inhibition of phytochrome-dependent spore germination 103

SHERWOOD, S. B., J. O. EVANS and C. ROSS: Gel electrophoresis studies of proteins from leaves of photoperiodically induced and vegetative cocklebur plants 111

YAMASHITA, T., J. TSUJI and G. TOMITA: Reactivation of the Hill reaction of Tris-washed chloroplasts 117

MATSUDA, Y., T. KIKUCHI and M. R. ISHIDA: Studies on chloroplast development in *Chlamydomonas reinhardtii* I. Effect of brief illumination of chlorophyll synthesis 127

INOUÉ, H. and M. NISHIMURA: Reactions of photosystems I and II in spinach chloroplast fragments treated with ethylene glycol 137

KAKU, S.: Changes in supercooling and freezing processes accompanying leaf maturation in *Buxus* 147

Short communications

DICKINSON, D. B. and M. D. DAVIES: Nucleoside diphosphate kinase from lily pollen 157

WATANABE, K., K. TANAKA, K. ASADA and Z. KASAI: The growth promoting effect of phytic acid on callus tissues of rice seed 161

UMEMOTO, T.: Effect of chlorogenic acid on flower production in long-day duckweed, *Lemna gibba* G3 165

No. 2, April, 1971

THINH, L. V. and D. J. GRIFFITHS: The contrasting effects of chloramphenicol and cycloheximide on the recovery of cell division and chlorophyll synthesis in "giant" cells of *Chlorella vulgaris* (Emerson strain) 171
NEAL, W. K., II., H.-P. HOFFMANN and C. A. PRICE: Sedimentation behavior and ultrastructure of mitochondria from repressed and derepressed yeast, *Saccharomyces cerevisiae* 181
SHIBAOKA, H.: Effects of indoleacetic, *p*-chlorophenoxyisobutyric and 2,4,6-trichlorophenoxyacetic acids on three phases of rooting in *Azukia* cuttings 193
KAMISAKA, S. and Y. MASUDA: Auxin-induced growth of tuber tissue of Jerusalem artichoke VI. Biochemical changes in chromatin during aging and cell expansion 201
WURZBURGER, J. and Y. LESHEM: Ribonucleic acid as an inducer of germination inhibition in *Aegilops Kotshyi* 211
TAKEO, T. and Y. KATO: Tea leaf peroxidase—Isolation and partial purification 217
MIHARA, S. and E. HASE: Studies on the vegetative life cycle of *Chlamydomonas reinhardi* Dangeard in synchronous culture I. Some characteristics of the cell cycle 225
MIHARA, S. and E. HASE: Studies on the vegetative life cycle of *Chlamydomonas reinhardi* Dangeard in synchronous culture II. Effects of chloramphenicol and cycloheximide on the length of cell cycle..... 237
NAGASHIMA, H., S. NAKAMURA, K. NISIZAWA and T. HORI: Enzymic synthesis of floridean starch in a red alga, *Serraticardia maxima* 243
OOTA, Y.: Disappearance of rhythmicity in growth response to dark- and light-breaks in *Lemna gibba* G3 due to iron deficiency 255
KISAKI, T., A. IMAI and N. E. TOLBERT: Intracellular localization of enzymes related to photorespiration in green leaves 267
KISAKI, T., N. YOSHIDA and A. IMAI: Glycine decarboxylase and serine formation in spinach leaf mitochondrial preparation with reference to photorespiration 275
GOLDSCHMIDT, E. E. and R. GOREN: A requirement for protein synthesis during the curvature of citrus petals 289
TANIGUCHI, M. and Y. SATOMURA: Physiological activity of a viridicatin derivative, 3-(4-phenylcarbostyriloxy)acetic acid 295
INGERSOLL, R. B. and O. E. SMITH: Transport of abscisic acid 301
ELEY, J. H.: Effect of carbon dioxide concentration on pigmentation in the blue-green alga *Anacystis nidulans* 311
CHANDRA, G. R., L. E. GREGORY and J. F. WORLEY: Studies on the initiation of adventitious roots on mung bean hypocotyl 317

No. 3, June, 1971

FLOHÉ, L. and H. MENZEL: The influence of glutathione upon light-induced high-amplitude swelling and lipid peroxide formation of spinach chloroplasts 325

HANSEN, U.-P. and D. GRADMANN: The action of sinusoidally modulated light on the membrane potential of *Acetabularia* 335
SAKAI, S. and H. IMASEKI: Auxin-induced ethylene production by mungbean hypocotyl segments 349
ASADA, K. and M. TAKAHASHI: Purification and properties of cytochrome *c* and two peroxidases from spinach leaves 361
SUGAHARA, K., N. MURATA and A. TAKAMIYA: Fluorescence of chlorophyll in brown algae and diatoms 377
RINNE, R. W. and D. T. CANVIN: Fatty acid biosynthesis from acetate and CO_2 in the developing soybean cotyledon 387
RINNE, R. W. and D. T. CANVIN: Fractionation of the fatty acid synthesizing system from the developing soybean cotyledon into a particulate and soluble component 395
MOMOTANI, Y. and J. KATO: α-Amylase synthesis by a cell free system and plant growth substances 405
SINGH, G. and O. P. GARG: Effect of red, far-red radiations on germination of cotton seed 411
SAKANO, K. and T. ASAHI: Biochemical studies on biogenesis of mitochondria in wounded sweet potato root tissue I. Time course analysis of increase in mitochondrial enzymes 417
SAKANO, K. and T. ASAHI: Biochemical studies on biogenesis of mitochondria in wounded sweet potato root tissue II. Active synthesis of membrane-bound protein of mitochondria 427
GILES, K. L. and A. O. TAYLOR: The control of chloroplast division in *Funaria hygrometrica* I. Patterns of nucleic acid, protein and lipid synthesis 437
GILES, K. L.: The control of chloroplast division in *Funaria hygrometrica* II. The effects of kinetin and indoleacetic acid on nucleic acids 447
SMITH, B. N.: Carbon isotope ratios of respired CO_2 from castor bean, corn, peanut, pea, radish, squash, sunflower and wheat seedlings 451

Short communications

INOUÉ, H., K. WAKAMATSU and M. NISHIMURA: Light-induced absorbance changes at 475–515 nm, and electron flow close to photosystem II in Tris-washed chloroplast fragments 457
BYFIELD, J. E. and Y. C. LEE: Studies on the efficiency of mRNA translation during cold shifts in *Tetrahymena* 461

No. 4, August, 1971

NOTTON, B. A. and E. J. HEWITT: Incorporation of radioactive molybdenum into protein during nitrate reductase formation and effect of molybdenum on nitrate reductase and diaphorase activities of spinach (*Spinacea oleracea* L.) 465
KATOH, S. and A. TAKAMIYA: Two modes of inhibition by 2-heptyl-4-hydroxyquinoline-*N*-oxide of electron transport associated with photosystem 2 in spinach chloroplasts 479

TANAKA, Y. and T. AKAZAWA: Enzymic mechanism of starch synthesis in ripening rice grains VI. Isozymes of starch synthetase 493
OGUNI, I. and I. URITANI: Participation of farnesol in the biosynthesis of ipomeamarone 507
MIYATA, H.: Endogenous light-on rhythm in respiration of a long-day duckweed, *Lemna gibba* G3 II. On basic and rhythmic components of the rhythm 517
SUGANO, N., S. MIYA and A. NISHI: Carotenoid synthesis in a suspension culture of carrot cells 525
EBATA, T. and Y. FUJITA: Changes in photosynthetic activity of the diatom *Phaeodactylum tricornutum* in a culture of limited volume 533
FUJITA, Y., T. EBATA and S. SHIMURA: Light-dependent oxygen uptake by non-living, chlorophyll-containing particles obtained from oceanic environments 543
KIMURA, M. and C. TANAKA: Inhibitory effects of monoamine oxidase inhibitors on the growth of pea and rice seedlings 551
OKU, T., H. KAWAHARA and G. TOMITA: The Hill reaction and oxygen uptake in isolated pine chloroplasts 559
WULFF, R. and E. MEDINA: Germination of seeds in *Hyptis suaveolens* Poit 567
SHIMODA, C., M. OSUMI and N. YANAGISHIMA: Responsiveness of yeast cells to auxin in relation to cell age 581
MATHES, M. C., E. D. HELTON and K. D. FISHER: The production of microbial-regulatory materials by isolated aspen tissue 593
KOCHHAR, T. S., P. R. BHALLA and P. S. SABHARWAL: Effect of tobacco smoke components on organogenesis in plant tissues 603
SRIVASTAVA, B. I. S., H. MATSUMOTO and K. C. CHADHA: Studies on chromatin-associated nuclease from barley leaves 609
OOTA, Y. and T. TSUDZUKI: Resemblance of growth substances to metal chelators with respect to their actions on duckweed growth 619
MIZUSAKI, S., Y. TANABE, M. NOGUCHI and E. TAMAKI: Phytochemical studies on tobacco alkaloids XIV. The occurrence and properties of putrescine *N*-methyltransferase in tobacco roots 633
FUJITA, Y. and R. SUZUKI: Studies on the Hill reaction of membrane fragments of blue-green algae I. Stabilizing effect of various media on the 2,6-dichlorophenol indophenol-Hill activity of membrane fragments obtained from *Anabaena cylindrica* and *Anabaena variabilis* 641

Short communications

NOBEL, P. S. and R. L. CRAIG: Relative anion permeabilities and concentrations in leaf cells of *Pisum sativum* determined using electrical measurements and the Goldman equation 653
GOLDSTEIN, L. D., P. H. JENNINGS and H. V. MARSH, Jr.: A preliminary investigation of L-phenylalanine ammonia-lyase activity in asparagus: Distribution and response to storage, excision and incubation 657

No. 5, October, 1971

TANIMOTO, E. and Y. MASUDA: Role of the epidermis in auxin-induced elongation of light-grown pea stem segments 663
OGASAWARA, N. and S. MIYACHI: Effects of dark preincubation and chloramphenicol on blue light-induced CO_2 incorporation in *Chlorella* cells 675
OKADA, M. and A. TAKAMIYA: Light-induced absorption spectrum changes of carotenoid chromatophores of photosynthetic bacterium, *Rhodopseudomonas spheroides* II. Rapid and slow absorption changes of carotenoid in chromatophores 683
ANZAI, T., H. SHIBAOKA and M. SHIMOKORIYAMA: Increases in the number of advantitious roots caused by 2-thiouracil and 5-bromodeoxyuridine in *Phaseolus mungo* cuttings 695
LIGNOWSKI, E. M. and E. G. SCOTT: Trifluralin and root growth 701
ASADA, K. and M. TAKAHASHI: Conservation of electron transport and energy transfer reactions of spinach chloroplasts in glycerol 709
NICKELLS, M. W., G. M. SCHAEFER and A. G. GALSKY: The action of cyclic-AMP on GA_3 controlled responses I. Induction of barley endosperm protease and acid phosphatase activity by cyclic-3′,5′-adenosine monophosphate 717
EARLE, K. M. and A. G. GALSKY: The action of cyclic-AMP on GA_3 controlled responses II. Similarities in the induction of barley endosperm ATPase activity by gibberellic acid and cyclic 3′,5′-adenosine monophosphate 727
LIGNOWSKI, E. M., W. E. SPLITTSTOESSER and K.-H. CHOU: Glutamine synthesis in germinating seeds of *Cucurbita moschata* 733
INOUÉ, H. and M. NISHIMURA: Electron flow from hydrogen peroxide in photosystem II-catalyzed oxidation-reduction reactions of spinach chloroplast fragments 739
SASAKI, S. and G. N. BROWN: Polysome formation in *Pinus resinosa* at initiation of seed germination 749
NOODÉN, L. D.: Physiological and developmental effects of colchicine 759

Short communication

WOCHOK, Z. S. and D. F. WETHERELL; Suppression of organized growth in cultured wild carrot tissue by 2-chloroethylphosphonic acid 771
HIROSE, S., K. YAMASHITA and K. SHIBATA: Formation of thiol groups in spinach chloroplasts by illumination 775
GALUN, E.: Morphogenesis in *Trichoderma*: Induction of conidiation by narrow-beam illumination of restricted areas of the fungal colony 779
DAVIES, P. J.: Further evidence against an IAA-tRNA complex 785
De LEO, P. and J. A. SACHER: Effect of abscisic acid and auxin on ribonuclease during ageing of bean endocarp tissue sections 791
MURAKAMI, K. and J. OHTA: Cytoplasmic control of mitosis in true slime mold, *Physarum polycephalum* 797

Muto, S. and I. Uritani: Effect of $NADP^+$ and glucose 6-phosphate on sedimentation behavior of glucose 6-phosphate dehydrogenase from sweet potato 803
Tsuji, T. and Y. Fujita: Ascorbate photooxidation by a photochemically active chromoprotein isolated from the blue-green alga *Anabaena cylindrica*: the effect of monochromatic illumination 807
Tsuboi, M. and N. Yanagishima: Effects of antimetabolites on flowering in *Arabidopsis* 813
Oji, Y. and G. Izawa: Rapid synthesis of glutamine during the initial period of ammonia assimilation in roots of barley plants 817

No. 6, December, 1971

Mizuno, K., A. Komamine and M. Shimokoriyama: Vessel element formation in cultured carrot-root phloem slices 823
Suge, H.: Stimulation of oat and rice mesocotyl growth by ethylene 831
McAfee, J. A. and P. W. Morgan: Rates of production and internal levels of ethylene in the vegetative cotton plant 839
Hope, H. J. and L. Ordin: Metabolism of 3-indoleacetic acid in tobacco exposed to the air pollutant peroxyacetyl nitrate 849
Mukohata, Y., M. Mitsudo, T. Nakae and K. Myojo: Biophysical studies on subcellular particles IV. The light scattering response and photosynthetic activities of spinach chloroplasts treated with *n*-alkanes 859
Mukohata, Y., M. Mitsudo, S. Kakumoto and M. Higashida: Biophysical studies on subcellular particles V. Effects of temperature on the ferricyanide-Hill reaction, the light-induced pH shift and the light scattering response of isolated spinach chloroplasts 869
Mae, T., K. Ohira and A. Fujiwara: Metabolism of S-methylcysteine and its sulfoxide in Chinese cabbage, *Brassica pekinensis* Rupr. 881
Sodek, L. and C. M. Wilson: Metabolism of ^{14}C-amino acids in developing endosperm of corn 889
Chen, J. C. W.: Effects of continuous illumination on the rhizome of *Caulerpa prolifera* 895
Horiguchi, T. and K. Kitagishi: Studies on rice seed protease V. Protease inhibitor in rice seed 907
Usuda, H., R. Kanai and M. Takeuchi: Comparison of carbon dioxide fixation and the fine structure in various assimilatory tissues of *Amaranthus retroflexus* L. 917
Novák, J. and A. W. Galston: Studies on auxin protector substances, IAA-oxidase and peroxidase in cotyledons of *Pharbitis nil* 931
Kaku, S.: A possible role of the endodermis as a barrier for ice propagation in the freezing of pine needles 941
Takeda, J., H. Morikawa, H. Kinoshita and M. Senda: Permeability of the *Nitella* internodal cell to organic substances as measured by the double chamber method 949

Ohmori, M. and A. Hattori: Nitrogen fixation and heterocysts in the blue-green alga *Anabaena cylindrica* 961
Miyata, H.: Endogenous light-on rhythm in respiration of a long-day duckweed, *Lemna gibba* G3 III. Relationship to frond production..... 969
Sorokin, C.: The capacity of growing algal cells to affect the pH and the buffering properties of the medium 979

Short communications

Hyodo, H.: Phenylalanine ammonia-lyase in strawberry fruits 989
Sivori, E. M., V. Sonvico and N. O. Fernandez: Determination of abscisic acid following Paleg's method 993
Mallery, C. H. and N. Richardson: Disc gel electrophoresis of biliproteins 997
Kamisaka, S. and Y. Masuda: Stimulation of gibberellin-induced germination in lettuce seeds by cyclic 3′,5′-adenosine monophosphate...1003
